FUNDING SOURCES FOR PUBLIC WATER AND WASTEWATER PROJECTS IN OHIO

<p>Construction</p>	<p>Ohio Capital Asset Financing Program (OhioCAF)</p> <p>David J. Conley Managing Director Robert W. Baird & Co. (888) 792-0039</p>	<p>Loan</p>	<p>Water/ Wastewater</p>	<p>The Ohio Capital Asset Financing program is a financing cooperative offered by the Center for Local Government to Ohio communities as an alternative to cash purchases or other forms of financing. The program: Allows multiple communities to combine their borrowing needs in a manner that enables them to enjoy better interest rates and lower financing costs, permits the financing of "Capital Asset" purchases over a period up to 25 years, based on asset life, reduces interest cost and financing expenses because of credit enhancements and economies of scale gained from the issuance of a single large bond issue compared to smaller individual issues, allows communities that cannot afford large capital outlays to spread the cost of capital assets over time, eliminates the need to prepare an individual Official Statement, does not require the participant to obtain a bond rating, minimizes the time and effort required for financing capital assets compared to using traditional methods.</p> <ul style="list-style-type: none"> ➤ Any county, city, village, township or fire district in the State of Ohio may be eligible ➤ Virtually any capital asset (life of five years or more) can be financed through the program, such as fire trucks, fire stations, police cruisers, maintenance buildings, road improvements and land purchases to name a few. The program can also be used to refinance existing bonds and/or outstanding notes ➤ Eligible members must pass either a resolution or ordinance authorizing the borrowing and then accept the final interest rates and terms once the program is funded ➤ When the \$5 Million Dollar minimum has been reached to do a financing, a timetable specific to that particular financing will be posted ASAP ➤ The program does not have a minimum nor maximum limit; however, your existing statutory debt limitations must be applied as they would under traditional borrowing methods ➤ www.ohiocaf.org 	<p>Current rates as of 01/09/12 for borrowing amount of \$5 million are:</p>	<table border="1"> <thead> <tr> <th><u>Bond Length</u></th> <th><u>Estimated Interest Rate</u></th> </tr> </thead> <tbody> <tr> <td>1</td> <td>2.78%</td> </tr> <tr> <td>5</td> <td>2.87%</td> </tr> <tr> <td>10</td> <td>3.27%</td> </tr> <tr> <td>15</td> <td>3.89%</td> </tr> <tr> <td>20</td> <td>4.36%</td> </tr> <tr> <td>25</td> <td>4.74%</td> </tr> </tbody> </table>	<u>Bond Length</u>	<u>Estimated Interest Rate</u>	1	2.78%	5	2.87%	10	3.27%	15	3.89%	20	4.36%	25	4.74%	<p>Repayment period can be from one to 25 years subject to the estimated life of the asset.</p> <p>Each member will be required to make semi-annual interest payments on May 15 and November 15 and annual principal payments on November 15. Members can choose annual repayment plans, however, that fit their individual cash flow needs. For example, they can choose level annual payments or increasing or decreasing annual payments</p> <p>Financings exceeding 10 years in length may be eligible for prepayment or refinancing subject to the same rules applicable to most fixed rate bonds</p> <p>The cost to participate is included in the interest rate of your financing. The actual cost will depend on the size and number of members participating since the advantage of the program is to "share" certain fixed expenses and to gain economies of scale. In any case, the cost under the program should be substantially less than an independent financing. Each participant will receive a detailed accounting of the cost at the closing of each financing</p>
